Subject: Overview of JO PRINT Platform Services and Operations

I. Executive Summary

JO PRINT is a leading digital platform in Jordan designed to facilitate the academic journey for students by connecting them with various academic service providers. The platform's core offerings include high-quality printing and delivery services, comprehensive summaries of school and university books, and access to experienced specialized tutors. It serves as a comprehensive marketplace, not only for students but also for printing offices seeking to expand their reach and manage their operations efficiently within the Jordanian market.

II. Core Services Offered by JO PRINT

JO PRINT provides three primary service categories:

- **Printing and Delivery:** Students can upload files, select printing options (paper type, binding, color, single/double-sided), and choose between office pick-up (free) or delivery to a specified address (2.00 JOD). The platform supports various file formats (PDF, DOC, DOCX, PPT, PPTX, XLS, XLSX, JPG, PNG) and offers specialized printing for documents, posters, personal photos, and photo albums. Print options include different paper weights (80-200 gram), sizes (A4, A3, A2, A1, A0, custom), binding types (staple, spiral, luxury), and additional features like covers, page numbers, and table of contents.
- **Customer Journey for Printing:** "The student creates a new account or logs in, selects 'Printing and Delivery,' uploads files (PDF, DOCX), specifies printing options (color/B&W, paper size, binding), provides delivery/pickup details, proceeds to payment, and can then track their order status." (Mستند المواصفات الفنية والوظيفية - منصة إنجاز.pdf)
- **Order Tracking:** Customers can track their orders using a tracking number, viewing real-time status updates from "Order Placed" to "Delivered." The tracking interface also provides details about the delivery agent and estimated arrival time, with options to contact support.
